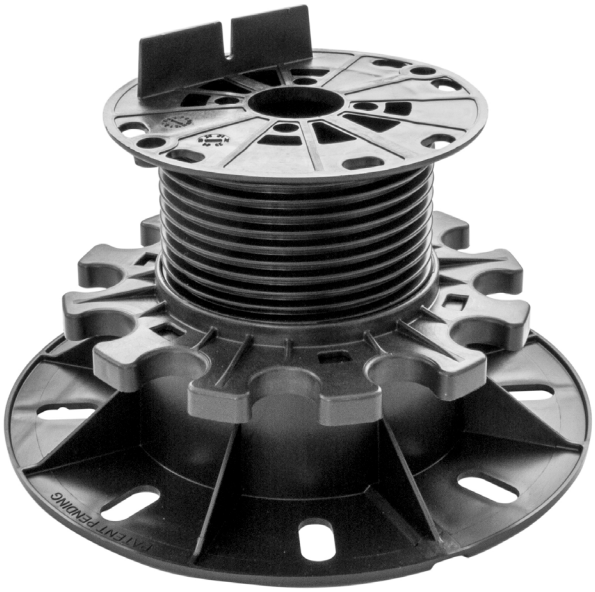
ONEWOOD®

ADJUSTABLE TERRACE PEDESTALS



DAKOTA™

DAKOTA adjustable terrace pedestals family consists of five leg and three elevation models:

- Adjustable terrace pedestal 10 mm to 20 mm
- Adjustable terrace pedestal 18 mm to 36 mm
- Adjustable terrace pedestal 35 mm to 60 mm
- Adjustable terrace pedestal 60 mm to 115 mm
- Adjustable terrace pedestal for sloping surface 41 to 66 mm (slope up to 5%)
- Adjustable terrace pedestal elevations 25, 50 and 100 mm
- We recommend using a protective rubber 200x200x3mm to dampen noise and smooth out minor bumps.

MATERIAL:	Polypropylene (PP)
LOAD CAPACITY:	At least 800 kg and 670 kg on the terrace pedestale of the inclined surface
TERMS OF USE:	Weatherproof −40/+80 °C
AREA OF USE:	They are used as supports for the foundations of terraces. Flat hard surfaces are suitable for installation, e.g. flat roofs, paving slabs, building blocks, compacted crushed stone or gravel.
HEIGHT RANGE:	10 mm to 115 mm, with elevations up to 900 mm
COMPLETENESS:	The product consists of a base, a rotating nut and a head with one mounting edge to the base.
GOOD ADVICE:	The base of the terrace pedestal is equipped with drainage grooves. The diameter of the base of the terrace pedestal is 200 mm and covers 314 cm². When using a terrace pedestal next to a wall or in a corner, it is easy to make the base of the terrace pedestal smaller to cut. For this purpose, special cutting points are molded into the base.
